

PRODUCT SHEET

# BRING YOUR **SHAREPOINT** **ASSETS** TO THE ENGAGED WEB!

## Introducing EPiServer® Connect for SharePoint®

With this module from EPiServer, you can easily bring your SharePoint documents and content to any EPiServer CMS-powered website. EPiServer has 10 years of experience in developing products that enable organizations to realize their web strategy and deliver on their business goals through engaging and unique websites.

Using this connector enables your SharePoint users to publish content directly to the web, extranet or intranet. With the new file integration, your EPiServer CMS website users can easily access and work with documents stored inside SharePoint.

## About EPiServer CMS

EPiServer CMS supports true web engagement, allowing companies to turn passive web visits into dynamic, personalized web experiences that drive new revenues and offer valuable new services to customers of every shape and size. With the award winning web content management capabilities found in .NET based EPiServer CMS, customers can create high impact, revenue-generating collaborative websites rapidly and with no limitations in design and functionality.

By extending EPiServer CMS with EPiServer Relate, EPiServer Mail and third party add-on modules from the EPiMore marketplace, you can instantly grow your online presence when needed.

## Benefits

- Combine the best of SharePoint enterprise functionality with the powerful Web Content Management and Social Web capabilities of EPiServer CMS.
- Manage all your documents and content assets in a single repository and make these assets available to your website easily.
- Fully harvest the benefits of your SharePoint investment by enabling users to directly make content available to websites powered by EPiServer CMS.
- Empower your SharePoint users and turn them into web content contributors.
- Both EPiServer CMS and SharePoint are built on Microsoft .NET – a standard Microsoft technology, providing a secure, robust and future-safe software development platform.

# EPIserver Connect for SharePoint – Feature areas

## PUSH-TO-CMS

One-way pushing of files and content items from SharePoint to EPiServer CMS.

### Key features:

- Easy for SharePoint users to publish content to pre-configured EPiServer CMS channels.
- Suitable for loosely connected servers as well as secured networks.
- Push files & documents as well as SharePoint items (News, Calendar items etc).
- High performance, read-only solutions where there are needs to deploy massive content to the Web without putting a load on your SharePoint repository.

## FILE INTEGRATION

Bi-directional file integration between EPiServer CMS and SharePoint libraries (documents, images etc).

### Key features:

- Manage files stored in SharePoint from EPiServer CMS (read, edit, add and delete).
- Make SharePoint files and documents instantly available to the Web site once they are stored in SharePoint.
- Work with versioning of library items.
- Integrated security allows authenticated users to only access documents they have permission for.

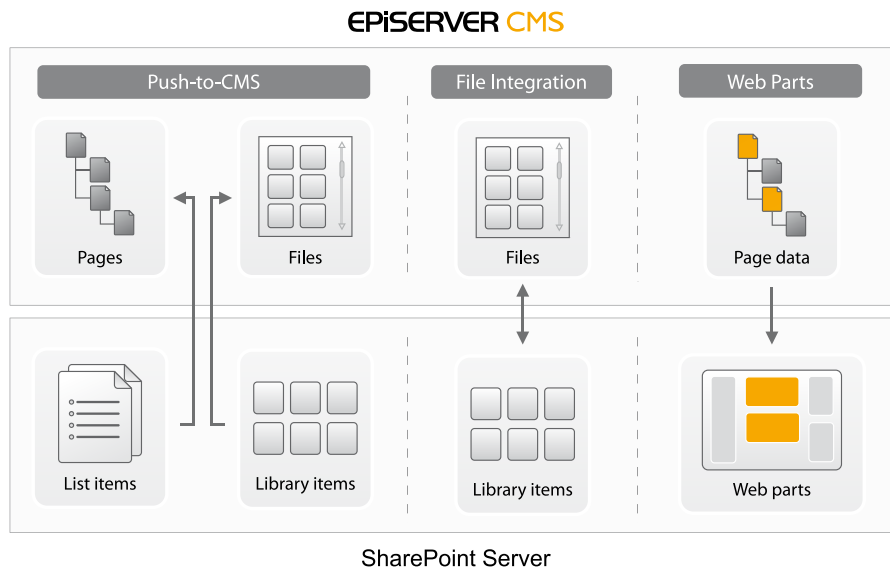

## CMS CONTENT IN SHAREPOINT

Contains simple yet flexible web parts that display EPiServer CMS content directly in SharePoint sites.

### Key features:

- Display content lists and details easily by adding web parts to your SharePoint site.
- Manage which content and properties that will be displayed in SharePoint.
- Easy to enhance and improve the basic functionality of these web parts.
- Get a kick start in integrating your EPiServer CMS with SharePoint.

By combining the function areas of Connect for SharePoint, system integrators will find it very easy to fulfill most scenarios related to SharePoint and EPiServer CMS.
